PROFILE

We are a software development and UI/UX design team with over seven years of experience. Our primary expertise is website development with .net core, react next js, and angular technologies. Also, we have three years of experience with the Flutter framework in the mobile development field. We have also used Figma and Adobe XD tools in UI/UX design. In addition, we have the experience of using Microsoft Azure for CI/CD automation.

Our recent projects :

Home Servize (Front-End)

April 2021 - Present

homeservize.com

The Home Servize website is a comprehensive online system requesting home services and repairs. This website registers requests for on-site services and repairs, such as cleaning, moving furniture, etc., for its users. This service platform can handle many requests without interruption and reduce performance.

Technologies:

React Next js, and Material UI.

Ata Oil

January 2022 - June 2022

ataoil.ir

Ata Oil is a website and web application that provides users with the possibility of on-site periodic car service, such as oil changes, etc. This website has three sections: user, admin, and technician, so that in addition to the user, the group can efficiently perform the processes.

Technologies:

.Net core , Postgresql, React Next js, Bootstrap and Material UI.

GTA online store

July 2021- January 2022

gtasilver.com

The GTA online store has been designed to speed up service to this brand's users. The appearance of this store website doubles the beauty of silver jewelry so that the user can enjoy the store's visual effects and have a great user experience.

Technologies:

.Net core , Postgresql, React Next js, Angular, Bootstrap, and Material UI.

Raman

May 2022- August 2022

ramaneducation.com

Raman is an educational counseling system. This system works in the field of academic counseling for students. This website has provided a suitable learning environment for students with an excellent user interface.

Technologies:

.Net core , Postgresql, React Next js, Angular, and Material UI.
